

NOVA LUCE

The manual consists of five numbered steps:

- Step 1:** Shows the removal of the top cover and the installation of the mounting arm. A screwdriver (A) is used to remove the cover, and a screwdriver (B) is used to adjust the arm.
- Step 2:** Shows the installation of the mounting arm into the ceiling. A screwdriver (A) is used to secure the arm, and a screwdriver (B) is used to adjust the arm's position.
- Step 3:** Shows the installation of the mounting arm into the ceiling. A screwdriver (A) is used to secure the arm, and a screwdriver (B) is used to adjust the arm's position.
- Step 4:** Shows the connection of the power wires to the ceiling. A screwdriver (A) is used to secure the wires, and a screwdriver (B) is used to adjust the arm's position.
- Step 5:** Shows the final assembly of the light fixture. A screwdriver (A) is used to secure the fixture, and a screwdriver (B) is used to adjust the arm's position.

The final assembly shows three different light fixture configurations: a small cylindrical fixture, a medium cylindrical fixture, and a large rectangular fixture, all suspended from the ceiling by three cables.
